

ECSTATICA ADDENDUM

The game gives a DOS/4GW Fatal Error Message. This also causes sound problems, such as no speech/SFX.

The game uses only HIMEM.SYS to run, and to get it to work you will need to edit the CONFIG.SYS & AUTOEXEC.BAT files (use the boot disk instructions) you will need to look for the following lines

CONFIG.SYS

DEVICE=C:\DOS\EMM386.EXE

AUTOEXEC.BAT

LH C:\DOS\SMARTDRV.EXE

Where the italic font is, the text may vary, you will need to place REM at the start of these lines, and then save the files and reset the machine, the game should then work fine.

BOOT DISK INSTRUCTIONS

Instructions for making a boot disk.

- 1. Format a blank floppy disk with the command, `FORMAT A: /S`**
- 2. Copy your normal `CONFIG/autoexec` onto it, `COPY C:\CONFIG.SYS A:\` then `COPY C:\AUTOEXEC.BAT A:\`**
- 3. Make the changes to the files as necessary or as described in the Boot Disk Setup sheet.**
- 4. Make sure all spaces, punctuation, spelling is as it should be.**
- 5. Exit the Edit program by clicking on File, then Save or Exit.**

Instructions for using a boot disk

Place the disk into the floppy drive, and then reset the machine which will now run with the set-up provided on the disk.

Remember, not all PC games have the same requirements so you may need to update the Boot Disk with different games.
